THE LEADING BRAND FOR PROTECTIVE COLD STORE CLOTHING WORLDWIDE

- Designing, testing and manufacturing high performance products for people encountering extreme cold All delivered with exceptional customer service, creating the optimal experience for the wearer.
- 2 Creating unique products to optimise breathability, durability, and flexibility whilst still ensuring warmth and comfort.
- Continually testing and refining our products to guarantee that the best is being produced for our customers.

KEEPING PEOPLE WARM & COMFORTABLE

With over 43 years experience, working directly with temperature controlled logistics companies and warehouse operatives, you can be confident that with FlexiTog you will experience the highest standards; our story began back in 1979:

1979

BORN OUT OF PASSION

We started out with one simple goal: To keep people safe.

Not simply a job, this endeavour quickly became our mission, our passion and our life. Innovation became a necessity and this soon became our driving force.

2006

IDENTIFYING THE NEED

Specific solutions for cold store environments had developed our own cold storage clothing range.

Large corporations and their staff quickly realised the benefits to them and the brand spread like wildfire.

2013

SOLIDIFYING OUR POSITION

The escalating success of FlexiTog drove the team to focus on further improving and expanding our existing ranges to establish FlexiTog as a leading name in the industry of cold store protective clothing.

2020

20 YEARS OF FLEXITOG

Having sold over 7 million products globally: Our promise is to continue developing, ensuring we always have the warmest and most comfortable solution, providing you with the best service, at the drop of a hat.

2004

PERFECTING OUR SKILLS

Over 2 generations, we further refined our skills, steadily finding our speciality in cold temperature protective clothing. Identifying a gap in the frozen food industry for effective certified safety clothing.

<u> 2010</u>

THE EXPEDITION TO SUCCESS

After supporting the British Antarctic Expedition this inspired a new wave of research within our insulation division. As Clo-I became its own brand focusing on pushing the boundaries in terms of insulation.

2017

TESTING TO THE EXTREME

The Irish WingSuit Team asked for FlexiTog's help in their death-defying attempt at a record breaking jump from 35000ft.

Temperatures of below -50°C with the wind-chill factor of a staggering -96°C were catered for.

2021 ONWARDS

OVERCOMING CHALLENGES

We kept our clients supplied through COVID-19, employed every available resource to overcome Brexit customs issues, and kept our customers supplied through the shipping crisis with our reliable European supply chain and plentiful stock.

WHAT IS BEHIND THE TAB?

IT'S OUR MARK OF QUALITY AND SEAL OF APPROVAL

When you buy a product with the FlexiTog® Tab you know that it's going to be comfortable and warm, developed with 20 years of research and development and made to stand the test of time.

Extreme care goes into developing every one of our garments to make sure that it is an improvement on the previous version and better than any other on the market.

ONLY THE BEST CAN WEAR THE TAB OF QUALITY

BESPOKE MATERIALS

Development of specially made Fabrics and bespoke insulations specifically designed to suit the breathability and warmth of the application of the product.

UNIQUE FEATURES

Unique and patented product features to make your life easier, such as **UG Grips** and **FlexEasy**.

INNOVATIVE DESIGN

Solutions obtained from **nature** and **technological** advancements ensure our product range is **continually evolving**.

EXHAUSTIVE PRODUCT TESTING

Unique stress-tests are performed at our in-house laboratory as well as Cold store applications to record product performance with live data.

FlexiTog®

HAPPY CUSTOMERS

Solving issues of the chilled industry

Paul Jackson from Chiltern Distribution explains how in the past garments have been either too hot or not warm enough:

"With the new ActiveChill Jacket my guys have got a lightweight jacket that performs well in the chilled temperatures that keeps them warm as well so that for me it's a revelation..!"

ACTIVECHILL JACKET
X14J
Page 32

We've tried a few different brands over the years but my staff prefer FlexiTog.

The **Endurance collection** is a quality product that provides **better protection** and flexibility.

SEE REVIEWS

THE ULTIMATE RANGE OF WORKWEAR SOLUTIONS

The FlexiTog range is split into three distinct collections based on their product features and level of protection:

CLASSIC™

Our best selling collection trusted by thousands of workers across the globe for all round warmth and comfort.

ENDURANCE

Our most lightweight, breathable and durable collection. Designed to help highly active users in cold environments endure!

Ice Diamond™

Our warmest and most luxurious collection designed to bring ultimate warmth to those working in deep freeze conditions.

INNOVATIVE PRODUCT FEATURES

A new innovative fabric designed and tested to double the industry standard to endure maximum wear in tough conditions.

Placed in high wear areas to increase longevity of the garment.

VOICEPICK COMPATIBLE

VoicePick pocket and loops inside the jacket provide a solution that is up-to-date with the latest picking systems.

The aperture on the collar also provides an opening for the headset that won't let cold air in.

BREATHEASY

BreathEasy panelling on the inside back of the jacket regulates air flow and temperature in high perspiration areas, keeping the wearer more comfortable.

FLE EASY

4 Way stretch fabric panel joining sleeve and body, designed to offer greater flexibility and easy movement of arms.

Vivo is the concept where a series of tiny apertures are set within the insulation to enhance the breathability without losing thermal performance. The Vivo concept increases the breathability of the insulation by over 30%.

Insulation 8

Clo Insulation is used widely across FlexiTog's clothing range. This standard of insulation would usually only be found in sports clothing, however we have used it in our garments because of the outstanding warmth retention and thermal regulating performance that it gives.

PRODUCTS DESIGNED FOR SPECIFIC APPLICATIONS

By designing garments around specific job roles, our product range ensures that every worker in the cold store can be kept comfortable, whatever their activity level and temperature.

TEMPERATURE RANGE

The white bar tells you the temperature ranges we recommend wearing the garment; from +5°c to -50°c.

WEARER GUIDE

Available for each garment at the bottom of the page.

ACTIVITY

These illustrations indicate the three key types of activity that the garment is designed to be used for.

WORKWEAR FOR ALL ACTIVITY LEVELS & ENVIRONMENTS

TEMPERATURE RANGE

+5°C

OOC CHILLER

-50°C

ACTIVITY MANAGERS

Quick and easy to wear garments for added warmth and protection while visiting cold stores or working outside.

ACTIVITY PICKERS

Flexible, lightweight and breathable to allow you to maintain a high level of productivity in comfort, without overheating.

ACTIVITY DRIVERS

Designed for maximum warmth and comfort keeping you warm where and when it's needed most.

Why choose FlexiTog clothing?

WARMTH & BREATHABILITY

During extensive client trials with the largest cold store chain in Europe, tests showed that when compared to 3 other European brands FlexiTog was:

29% WARMER THAN AVERAGE

FlexiTog clothing out-performed the nearest competitor with the least drop in warmth.

54% IMPROVED BREATHABILITY

Our clothing proved to allow for better breathability compared to the alternative cold store clothing.

BETTER BREATHABILITY FOR INCREASED COMFORT

ENDURANCE™ DRIVE COLD STORE JACKET & SALOPETTE X29J / X29S See what makes these

COLD STORE CLOTHING

See what makes these so warm and comfortable!

CLOTHING CERTIFICATION

EN ISO 342:2017 & EN ISO 13688:2013 +A1:2021

The standard related to **garments for protection against cold** ranging from chill (-5°C) through to cold store (-25°C) to deep freeze (-40°C). The EN ISO 342 standard is determined by three parameters (A-C) detailed below: The standard does not contain any specific requirements for head, hand or foot protection.

CLOTHING page 12

A. THERMAL INSULATION (WITH MOTION)

Indicates the thermal insulation of the garment in Icler $(m^2.K/W)$, the higher the value the better the insulating properties. The [B] indicates that the item has been tested with thermal undergarments specified in the standard.

B. AIR PERMEABILITY

This indicates breathability of a garment, (1 highest, 3 lowest) breathability. A high air permeability allows for proper dry evaporative heat loss required to keep you warm and comfortable.

C. WATERPROOF PENETRATION

Determines waterproof properties - this is not a requirement as garments being used in sub zero temperatures do not require waterproofing capabilities.

FOOTWEAR CERTIFICATION

FOOTWEAR page 82

EN ISO 20345:2011

The standard protection for professional safety footwear.

There is a qualifying test which all safety footwear must pass and then other additional tests relating to additional safety aspects of the boot.

A. SHORT CODE CATEGORIES

- **SB** Toe protection to 200J
- **SB-P** As above with a penetration resistant sole
- Upper from material other than all rubber or polymeric +Closed seat region +SB+A+E
- **S1-P** As above with the addition of a penetration resistant sole
- 52 Has met all S1 Requirements with the addition of WRU (Water-resistant upper)
- 53 Has met all requirements for both S1 & S2 and also includes P (penetration resistant sole) and cleated outer soles

B. OPTIONAL CATEGORIES

- **HR0** Heat resistant outsole compound tested at 300°C
- P Penetration resistant outsole tested at 1100 Newtons force
- A Electrical resistance between foot and ground of between 0.1 and 1000 Mega Ohms
- Electrical resistance between foot and ground of less than0.1 Mega Ohms
- CI Insulation against cold (-17°C). Upper is tested for it's insulating properties.
- HI Insulation against heat
- **E** Energy absorption of the seat region tested at 20 joules

WR Water resistant footwear

CR Cut resistant footwear

Metatarsal protection (100J)

EN ISO 20345:2011

C. SLIP RESISTANCE

- SRA Minimum CoF of 0.28 in the heel and 0.32 tested flat using a pressed clay tile floor surface with Sodium Lauryl Sulphate lubricant
- **SRB** Minimum CoF of 0.13 in the heel and 0.18 tested flat using a stainless steel floor surface with Glycerol lubricant
- SRC Has met requirements of both SRA & SRB

GLOVE CERTIFICATION

GLOVES page 56

EN ISO 388

The EN ISO 388 is the standard related to protection levels for safety gloves. This certificate assess the glove protection levels for abrasion, blade cuts, tears and punctures.

EN ISO 511

Focused on **protecting hands against cold** and is based on thermal resistance to convective and contact cold, with an optional test for water permeability.

A. ABRASION

This tests how many revolutions it takes to create a hole, with an abrasive material under a stipulated pressure. Rated from (1-4), 4 being the most resistant.

B. BLADE CUT

This tests the number of cycles for a blade, running at a constant speed, to cut through the material. Rated from (1-4), 4 being the most resistant to cuts.

C. TEAR

This tests the amount of force (N) required to tear the glove. Rated from (1-4), 4 being the most resistant.

D. PUNCTURE

This tests the amount of pressure required to puncture material with a standard size point. Rated from (1-4), 4 being the most resistant.

E. CUT

If the knife gets dull during the coup test, see point I, this test shall be performed instead. The result is given by a letter, A to F, where F indicates the highest protection.

F. IMPACT

If the glove has an impact protection, this information is given by the letter P as the 6th and last sign. If no P sign, no impact protection is claimed.

G. CONVECTIVE (COLD)

This measures the transfer of cold via convection and is rated from (0-4), 4 being the most resistant.

H. CONTACT (COLD)

This measures the thermal resistance when the glove is in contact with a cold object. Rated from [0-4], 4 being the most resistant.

I. WATER PERMEABILITY

This measures the gloves resistance to water penetration. Water penetration rated as (1) no water penetration rated as (0).

CARE INSTRUCTIONS

GARMENT WASHING GUIDE

Washing instructions and garment code can be found in the centre of the information label inside the garment, as shown. This guide covers FlexiTog branded garments only. Information provided here is intended as a guide.

MACHINE WASHING SYMBOLS

Great care should be taken when laundering FlexiTog products; follow the symbols:

MACHINE WASH COLD

Initial water temperature should not exceed 30°C or 65 to 85°F.

MACHINE WASH WARM

Initial water temperature should not exceed 40°C or 105°F.

DO NOT BLEACH

Garment is not colour-fast or structurally able to withstand any bleach products.

DO NOT IRON

Item material is not suitable to be smoothed or finished with an iron.

IRON LOW

Regular ironing, steam or dry, performed at Low setting (110°C, 230°F) only.

IRON MEDIUM

Regular ironing, steam or dry, performed at Medium setting (150°C, 300°F).

DO NOT DRY-CLEAN

Garment may not be commercially drycleaned.

TUMBLE DRY LOW

A machine dryer may be regularly used at a Low Heat setting.

DRY FLAT

A machine dryer may be regularly used at a Low Heat setting.

HEADWEAR

FH75 FH88 FH89 FH90 FH91 FH92 FH94 FH96

- · Hand wash with cool water
- No bleach
- Dry flat

GLOVES

ALL GLOVES

It is generally recommended that gloves should not be washed and only wiped down with a cool wet cloth. If washing is absolutely necessary then the following points should be adhered to.

- Hand wash with cool water
- No bleach
- Dry flat

FREEZER WEAR

ALL JACKET & TROUSERS

- Machine wash Warm (40°C)
- Do NOT Iron, Dry-clean, Bleach
- Tumble Dry Low

THERMALS

X30SS X30LS X30LJ (WHITE)

- Machine wash Cool (30°C)
- Iron Medium

• Do NOT Dry-clean, Bleach, Tumble Dry

X50SS X50LS X50LJ (BLACK)

- Machine wash Warm (40°C)
- Iron Medium
- Do NOT Dry-clean, Bleach, Tumble Dry

SOCKS

XS82 XS86 XS94

- Machine wash Cool (30°C)
- Do NOT Iron, Dry-clean, Bleach
- Tumble Dry Low

XS84

- Machine wash Warm (40°C)
- Do NOT Iron, Dry-clean, Bleach
- Tumble Dry Low

SIZING GUIDE

CLOTHING

MEASURING GUIDE

Always measure against the body including any undergarments (thermals etc) that would be worn under the outer garments.

MEASURING YOUR CHEST

Measurements should be taken from under the arm at the fullest part around the chest horizontally around the full girth of your body.

MEASURING YOUR WAIST

With your feet placed together, measurements should be taken from around the natural hip line (put one finger between the tape and your body before you measure).

If in doubt go up a size!

MENS	WOMENS	CHEST INCHES	WAIST INCHES	CHEST CM	WAIST CM
XS	6	34	28	86.5	71
S	10	36	30	91.5	76
М	12	38	32	96.5	81.5
L	14	40-42	34-36	101.5-106.5	86.5-91.5
XL	16	44-46	38-40	112-117	96.5-101.
2XL	18	48-50	42-44	122-127	106.5-112
3XL	20	52-54	46-48	132-137	117-122
4XL	22	58-59	50-52	142-147.5	127-132
5XL	24	60-62	54-56	152.5-157.5	137-142
6XL	26	64-66	58-60	162.5-167.5	147.5-152.

FOOTWEAR

MEASURING GUIDE

All our footwear conforms to the standard UK sizing convention.

UK	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
EUR0	36	37	38	39	41	42	43	44	46	47	48	49	50	51	52
USA	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18

GLOVES

WHICH HAND?

Measure the diameter at the knuckles of your dominant hand.

THE RIGHT FIT

Gloves that are too tight will result in cold hands, so if in doubt go up a size!

SIZE	CM	INCHES
XS	15	6
S	18	7
М	20	8
L	22.5-25.5	9-10
XL	28	11
2XL	30.5	12
